PHOTOSHOP TRAINING

Photoshop Training

CSA 395: Saturday; 9:00A.M. - Noon

This course proposes to strengthen the student's photography skills through exercises in camera use, photo editing, Photoshop editing, printing, print mounting and critical evaluation of photos. Early discussions examine several critical aspects of photography, including choice of subject, composition, use of light, and contrast. The photo lab immerses students in exploration of Photoshop in order to acquaint students with the software's many tools. Further, students will explore printing on various media and learn to trim, mount, even frame their art, etc.
