Gain In-Demand Skills for a Bright Future

Are you ready to take your career to the next level?

This 100-hour program will equip you with Smart Building Technology and Energy Efficiency knowledge and skills.

Learn the technology that’s shaping the future.

Topics Include:
- Residential & Commercial Energy Efficiency: Discover how buildings are becoming smarter and more energy-efficient and learn about energy-saving practices.
- Building Optimization Skills: Learn how buildings are optimized for better performance and energy-saving operations.
- Building Automation Systems: Understand controllers and the software that controls modern building automation systems.

Certifications Include:
- Building Performance Institute (BPI): Building Science Principles

The Employment and Training Fund covers the cost of tuition, currently set at $5,000. You will be responsible for books and training materials.

*Classes are in a hybrid format, both online in-person*
